

Parking Lot Repair and Renovation (Updated Map)

Oct 7, 2017

Dear Tenants:

Starting coming Monday, we will begin our parking lot improvement work. First, we will repair 11 deteriorated sections located in both front and back parking lots. Repair work requires cutting deep holes to repair the base, so please walk and drive with caution.

Should weather permits, seal-coating will begin coming Wed. As seal-coating requires a dry asphalt (no rainy weather), our service provider could not commit to a fixed schedule. To ensure our shopping center remains accessible, we have split the work into 7 sections. Mindful of customer traffic, most of the work will be conducted over weekdays. Do note that sealcoat takes one day to do the work and one day to dry, so a section under work may not be accessible for 2 days. Below please find a map of the 6 sections.

We want to finish the renovation work as soon as possible to minimize the inconvenience caused to you and your customer. We thank you for your patience and cooperation during this period. We look forward to a refreshed parking lot after the renovation.

Thank you for your attention,
Diho Square Management.
